

# Hand Painted Tubeline Tiles

## Thistle of Tay

Ivory Blue

**Tubeline Tiles** were traditionally made to withstand the high temperatures generated by a working fireplace and performed the practical function of reflecting heat into the room when placed at an angle facing inward.

With a choice of six designs and various colour options, two runs of five tiles make up a set to fit into an Integra tiled insert. Poppy tile sets include a left and right-handed design.

Our hand painted tubeline tiles are manufactured in the UK in the traditional way and will be subject to colour variation and crazing.

# Cast-iron Sleeves

## Matt Black

Lily Urm

Med Poppy

Tulip

Art Deco

**Cast-iron Sleeves** are an alternative to the more colourful tubeline tiles.

Sleeves are supplied in pairs to suit an Integra casting and these are available in a matt black, antique or highlight polished finishes.

There is a choice of four cast-iron sleeve designs and the Mediterranean Poppy has a left and right handed design.

## Cast-iron Care

### Packaging

Your Integra/Electra cast-iron fireplace is packaged so as to minimise exposure to adverse elements and should reach you in perfect condition. Your fireplace should be stored in a warm, dry environment and remain packaged until it is ready to be installed. This will prevent accidental damage being caused, which will not be covered under warranty.

### Cleaning

Your Integra/Electra casting requires only the minimum upkeep and it should remain in superb condition for many years.

Matt Black finishes can be maintained simply by dusting with a dry paintbrush. Cast Tec matt black stove paint is available for touching up if necessary but expert advice should be taken before application.

Antique finishes can be maintained simply by brushing with a dedicated shoe or polishing brush. Grate polish should only be applied if the original finish becomes too tarnished.

Polished and Highlight Polished areas can be wiped clean with a dry cloth, especially if an 'orange' colour appears on the waxed polished surface after fitting. Severe tarnishing on polished areas can be improved by using a very fine wire wool.

### Warning

Cast-iron products are vulnerable to rust and tarnishing if exposed to dampness or water. Avoid using damp clothes, water based liquids, furniture polish, detergents, oils, grease etc. on the surface of the casting. Should your fireplace become wet for any reason, dab it gently with a dry cloth. This should prevent any tarnishing or rust from forming.

It is normal for some discolouration to occur to the working parts of a cast-iron fireplace, especially where it comes into contact with severe heat or a naked flame. This discolouration will not effect the strength or practicality of the parts affected.

### General Information

Products shown in this brochure are manufactured for Cast Tec Ltd., who, with a professional group of companies, distribute them exclusively in the U.K.

Goods must be checked prior to installation, as no responsibility will be accepted thereafter for the redecoration, removal or reinstallation of products.

Faulted goods must be reported within 48 hours of delivery or as soon as practicable.

Installation of Integra gas appliances should be carried out by Gas Safe Registered fitters. No responsibility will be accepted for damage

or problems arising from an incorrect or unqualified installation.

Integra is a registered trademark and the Integra Split Fascia Concept is patented.

Cast Tec Ltd., reserve the right to delay or withdraw products, change designs, specifications or materials without prior notice due to continuous product development or supply issues.
