HEAT & COOK COLLECTION

MAKING EVERY AL FRESCO GATHERING MEMORABLE

Bask in firelight and radiant warmth in your garden all year round with the Heat & Cook Grill 50, as well as cook up a culinary storm! An outdoor woodburner featuring an integrated dual-depth grill, side shelves and an innovative baffle system for directing heat, this dual-function model delivers a truly authentic barbecue grill experience. With a grill that can be rotated into a shallower or deeper position, you can adjust it for your needs, whether that is sizzling up steaks, or slow roasting a larger joint! If you're looking to indulge in only the fireside experience, switch back into heating mode.

Alternatively, the Heat 50 model offers solely the ambience of an outdoor wood stove, bringing the ultimate open-air essential and allowing you to sit by the fire to enjoy the heat and glow of flickering flames.

Incorporating award-winning stove technology into these luxury outdoor woodburners, the Hestia Heat & Cook collection offers stylish, functional focal points for every al fresco gathering.

EASILY ADJUST BETWEEN HEAT & COOK MODE

**HESTIA HEAT &
COOK GRILL 50**
IN COOK MODE

INNOVATIVE HEAT & COOK GRILL BAFFLE SYSTEM

An integrated baffle system* lets you adjust the direction of heat between heat and cook mode.

Lowering the baffle to cook mode directs the heat to the grill above, keeps the glass cleaner and protects you from the heat of the fire while you barbecue to your heart's content!

Once you are in cook mode, you can keep track of your cooking temperature using the thermometer. For heat mode, the baffle can be lifted to enjoy the full heat output and aesthetic beauty of the woodburning fire.

The Heat & Cook Grill 50 features handy, stainless steel removable side shelves to help you serve up delectable food to family and guests.

**Heat & Cook Grill 50 only*

HESTIA HEAT 50

Product Code: 765-120

IMPORTANT INFORMATION

Whilst the Hestia Heat & Cook collection is designed for outdoor use and is made from high-quality materials, a waterproof cover is recommended for extra protection from the elements. Ensure your Hestia has completely cooled down and all embers and ash have been removed before covering.

Always place the appliance on a non-combustible surface, and check that there is no combustible material above the appliance (such as trees etc). Ensure the appliance is stable before lighting, and ensure you wear gloves as all surfaces will become hot when in use. Please take additional care in the presence of children and pets.

Do not use indoors, or in a tent, and do not move the appliance when hot.

For full warranty details and information about essential care and maintenance, please see the user manual or visit yourdragonfly.com/warranty
