THE EVOLUTION OF FIRE

A New Generation of Eco Design Compliant Stoves

This unique collection of stoves is designed exclusively for the UK market and seamlessly incorporates mankind's love of fire into the modern, energy efficient home.

An elegant range of stoves offering a convenient choice of heat outputs and styles, the new EcoDesign 2022 compliant Woolly Mammoth Collection brings the comforting glow of a real fire into your home in a modern, controllable and highly efficient way.

A True Evolution of Fire.

Choose British

The Woolly Mammoth brand was conceived in the UK and designed in-house specifically for the domestic market with HETAS trained professionals and BSRIA technicians here in the UK overseeing the development of every feature and aspect. Each lovingly crafted Woolly Mammoth stove undergoes a full check before passing quality control to ensure that every model is supplied in premium condition.

Choose Style

The clean yet timeless design of the Woolly Mammoth Collection ensures these solid fuel heating appliances are equally adept in both traditional and contemporary settings and are the perfect companion for your living space. This new diverse collection of wood-burning and multi-fuel stoves feature a multitude of options including direct external air compatibility, a selection of leg and log store options and hand-painted door frame colours, ensuring Woolly Mammoth Stoves offer something to suit all tastes and room spaces.

Choose the Environment

The impact our stoves have on the environment has always been at the forefront of our minds when creating the Woolly Mammoth Collection, and this has never been more prevalent than with the introduction of DEFRA's Clean Air Strategy and the Stove Industry Alliance's subsequent EcoDesign Ready scheme. And so we set the target of not simply meeting the stringent new efficiency and emission limits of the Eco Design regulations upon the implementation date of January 2022, but to surpass these ahead of schedule. By choosing a Woolly Mammoth Stove, you will unlock the full potential of a modern, highly-efficient wood burner and reduce your particulate emissions, fuel costs and carbon footprint on our planet.

Choose Woolly Mammoth

Each Woolly Mammoth Stove is manufactured with precision and quality of build in mind and boasts a wealth of innovative features.

- Latest EcoDesign and Clearskies compliant design for clean burning, efficient and low environmental impact wood burning
- Direct External Air Capable
- Suitable for 12mm Hearth
- Rear-drawn Air-Wash system for superior glass protection
- Adjustable Primary and Secondary Air Controls for true multi-fuel burning
- Adjustable Tertiary Air control for higher fuel efficiency
- Fully insulated fire box
- Generous Viewing Glass
- Effective Door and Glass Seals
- Sleek design featuring integrated door hinges
- Brushed handles and controls
- 150mm & 300mm leg/log store options
- Hand painted door colours available

WOOLLY MAMMOTH 5 MK2

By evolving the design of a traditional cast iron stove and introducing a contemporary steel body, the Woolly Mammoth 5 will reach optimum temperature swiftly and efficiently whilst still offering true multi-fuel capabilities.
